Grants Pass Clinic today has staff of 115, including 24 docs

By Diane_Graves

The Grants Pass Clinic moved into its current 62,5 million home on Ramsey Avenue in December of 2002.

Today it has boomed to an organization with 70-plus members. The staff of 115, including 24 docs has reverted to its original use as a home to the Siskiyou Community Medical Society's core group of physicians.

The clinic's focus, explained Ross Gassaway, president of the group, is to offer care at a price most people can afford. "We stick together and support each other. We have a family feel," said Diane Gootee, manager of the group.

"It's like a family," said Diane Gootee, who's been working with the group since 1983, still the clinic's fifth partner in 1953.

By 1994, primarily to help deal with the volume of work, the clinic converted to the computer system.

"You stick together and support each other," Gootee said.

"It's the result of the Mid Rogue Independent Physician Association's quest to computize medicine to make it easier, more efficient and error-proof. "It's like a family," said Diane Gootee, who's been working with the group since 1983, still the clinic's fifth partner in 1953.
